

## SMART AWARDS UNDERGROUND SAFETY

### COURSE OVERVIEW

This course is specifically designed for anyone working on the Openreach network who would be working in the underground network (UG). It is a mandatory requirement that any contractor must have to be compliant with Openreach standards.

### COURSE CONTENT

The course is aimed at providing the correct methodology for opening and closing chambers and street furniture (cabinets) in public highways, in accordance with the correct procedures. This course does not cover working in confined spaces.

- Identifying chamber types
- Gas testing using the correct methods
- Safely removing chamber covers
- The use of hydraulic lifters
- Site set up
- Dangers of gas within the network

### WHO IS THIS COURSE FOR?

The course is ideal for anyone working on the Openreach network.

### ASSESSMENT

The course will be both practical and written and will be marked internally by an approved assessor and externally by Smart Awards.
